EXECUTIVE SUMMARY

This executive summary contains the high-level scope of work involved in the project.

1. The main objectives of this project are:

- 1.1. To engage a suitable Vendor to supply, install, configure and test the data sharing platform for AITI; and
- 1.2. To train relevant AITI employees with regards to management, operation, administration and use of the data sharing platform.

2. The goals of that this data sharing platform aims to achieve are:

- 2.1. To support the development of smart solutions through customised use of data, by allowing industry players and consumers to access and use the data available in the data sharing platform; and
- 2.2. To deliver benefits to both industry players and consumers alike.

3. High-level Scope of Work:

- 3.1. To supply, install, configure and test the data sharing platform for AITI. This includes all relevant software, storage and warranty as well as any hardware, if necessary.
- 3.2. To provide an easy to use online platform to access, query, filter, visualise, and export datasets.
- 3.3. To provide an online platform that can generate output of the data in a variety of digital formats, including the in-platform mapping of data containing the necessary geographic elements.
- 3.4. To provide community developers interfaces (i.e. Application Programming Interface) that allows the creation of applications based upon access to one or more data sets within the platform.
